

OVERVIEW

The MX8030 probe series consist of 8mm tip diameter probes with VibeLock® connectors and Triaxial Cables. These models are available with all standard thread sizes and body configurations required in API 670 Standard. The probes offer a full 80 mil (2mm) range, and are designed to offer full API 670-compliant performance characteristics when used with a matching MX8031 extension cable and MX2033 driver. MX8030 probes are fully interchangeable with Bently Nevada** (BN) 3300 and 3300 XL 8mm probes.

NOTE: All Metrix* MX8030 series probes and extension cables are part of the 10000 series part number designation for agency approvals. The 10000 series p/n will appear on the product's label along with the MX8030 p/n. e.g. MX8030-AA-BBB-CCC-DD-EE = 103AA-BBB-CCC-DD-EE. PVC refers to the coating around the armor if selected.

**Intended to replace form factor for 11mm probes (Ex: model numbers 10037, 10038, 10039, 10040)

***For SIL approval, replace the first character in Option EE with an "S". **Note:** For all AA=PVC options, EE must equal 00 or S0.

SAFETY INTEGRITY LEVEL

SIL is a method or measurement unit to determine the reliability of electrical, electronic and programmable systems. The purpose of the SIL certification is to measure safety system performance and the likelihood of failure. Achieving SIL certification, based on the IEC61508 Functional Safety Standard, signifies that the product has been thoroughly assessed and is a reliable electronic device ready to use across a wide range of industries.

Metrix DPS products have been thoroughly evaluated by an independent third party agency on the basis of IEC61508 Functional Safety standards to obtain SIL certification.
